

e Gee Bee Y ARF

“A Golden Age park flyer”

The full scale Gee Bee model Y Senior Sportster was designed as a sports car of the air, not as a racer like the R1 and R2. It was clearly the best flying of all the Gee Bees.

Pacific Aeromodel's Gee Bee Y ARF has been available for several years now in 82" and 97" wingspans, and it quickly made a name for itself as a high quality kit and a fantastic flyer.

Now Pacific introduces the 36" version for electric flyers. Like it's larger brothers, it is a great flyer. Light, fast, nimble and fully aerobatic, it will also slow down to a walk for beautiful slow flybys and stable, no-stall landings.

Tired of foamy park flyers? Looking for something sexy, but simple and relaxing when you don't feel like breaking out the big birds?

The e Gee Bee Y is available by itself or with brushless motor / 20 amp ESC / 3 cell LiPo battery combos. Unlimited vertical is standard equipment. Assembly is super quick as well. Glue the wings together, install the motor and radio, grab some lunch and go fly.

With all this plus Pacific Aeromodel's famous high quality, how can you go wrong for only \$99.95?

Specifications:

- Wing Span: 35 1/4 in.
- Overall length: 27 1/4 in.
- Wing Area: 200 sq. in.
- Flying Weight: 20-22 ounces
