

# KNOCKABOUT ARF

“The Perfect Sportplane”

Aircraft design protected by:  
Copyright, 2007, James R. Feldmann

The dictionary defines **KNOCKABOUT** as  
“Something designed or suitable for rough or casual  
use; full of tough and exuberant animal spirits.”

We define it as a tough, casual, exuberant and **fun**  
airplane to have around when you get tired of taking  
your flying too seriously.

A special high lift airfoil makes the KNOCKABOUT  
ideal for on-the-deck flying, either high speed or low  
and slow. Sophisticated aerodynamics make it  
incredibly smooth in any attitude, yet it is raucously  
aerobatic at your command.

The KNOCKABOUT isn't a basic trainer. Heck, it will  
do a rudder-only knife-edge in either direction. But  
it's so smooth and forgiving that on low rates it is a  
terrific second airplane. The KNOCKABOUT isn't a  
pattern plane either, and it will never be a 3D star, but  
it will hover and pull out vertically with an OS 46 AX.

Oh yeah, it's also the easiest landing model we've  
ever seen. One wheel touch-and-go's? Sure, which  
wheel? This is the one airplane we **always** take to  
the field.

With all this plus Pacific Aeromodel's famous high  
quality and quick assembly, how can you go wrong  
for only \$149.95?

#### Specifications:

- Wing Span: 62 in.
- Overall length: 51 in.
- Wing Area: 690 sq. in.
- Flying Weight: 6 lb.
- Engine: .36-.52 (2-stroke), .52-.72 (4-stroke).
- Radio: 4 Channel, 4 Standard servos.
- Float and Tail-dragger ready.
- All wood construction.
- Custom-built wing and fuselage covered with premium iron-on film.
- Painted fiberglass cowl.
- Optional fiberglass wheel pants.
- 95% Factory assembled, ready to fly in just 10 hours.
- Quality hardware is included.

**Only \$149.95**

**Super combo** with OS 46 AX, spinner, prop and  
Hitec universal standard flight pack.....**\$359.95**

**Optional Wheel pants** .....**\$14.95**
