

CLIP WING MONOCOUCPE ARF

“The Legendary 110 Special, in 1/4 Scale”

Race pilot Johnny Livingston created the full scale Clip Wing Monocoupe in 1932 by clipping 9 feet off the wings of his standard Monocoupe and adding a 60% bigger engine. Before the war, the Clip Wing was a very successful racer, winning more races than all of the Gee Bees combined.

After WWII, the Clip Wing was used for aerobatic competition and airshows where it was again extremely successful, winning the first world aerobatic championship in 1948.

Pacific's Quarter scale replica captures the original's tough good looks, but our designers have tamed it's nature to the point where it is as easy to fly as any intermediate sport model. It is fully aerobatic, yet lands like a trainer.

Superb quality, easy assembly and front or rear mounts for your servos to help with the balance. This model is a stand-out.

Specifications:

- Wing Span: 69 in.
- Overall length: 63.5 in.
- Wing Area: 950 sq. in.
- Flying Weight: 12.5-14 lb.
- Engine: 1.20-1.80 (glow), 25-35cc (gas).
